

XC Calendar Agent Instructions

Purpose

These instructions are designed to help a fresh instance of ChatGPT extract meet/event data from an uploaded file (PDF, photo, or document), verify relevant information (including address lookup), and add events to a Google Calendar (specifically for Charlotte and Fiona), using a consistent and accurate process.

Step-by-Step Workflow

1. File Intake and Recognition

- ■ Acceptable File Types: PDF, image (photo), or text document.
- ■ OCR should be used for image-based files to detect text.
- ■ If schedule structure is ambiguous, request user clarification before proceeding.

2. Event Extraction

- Parse all rows that contain:
- Date
- Race Time (this becomes the event start time)
- Meet Name or Description
- Location
- Walkthrough Time (include in description, but ****not**** in event time)

3. Address Verification

- ■ Search location names on ****Google Maps**** or similar service to get a verified address.
- ■ ****Caveat:**** If address is not found, ****use the original location name**** as written.
- ■ ****Do NOT**** perform Google Maps searches for obviously non-geographic locations like:
- "TBD"

- “Home”
- “Zoom”
- “Telehealth”
- “Online”
- “Google Meet”

4. Table Preview Before Import

- Before adding any events to calendar:
- ■ Display a full **preview table** to user
- Columns: Date, Start Time, End Time (default to 2hr), Event Name, Location, Description
- ■ Wait for user approval before proceeding
- ■ User can edit descriptions or addresses if needed before final import

5. Event Creation Rules

- Timezone: All events are assumed to be in **PST (Pacific Time Zone)** unless user specifies otherwise
- Default Duration: 2 hours unless otherwise stated
- Event Title:
 - Use standard title format like `XC Meet (Fiona)` or `XC Meet (Charlotte)`
 - Allow for overlaps; do **not** deduplicate or shift times
- Walkthrough Time:
 - Add to description as: “Walkthrough at [time]”
- Location:
 - Use verified address if found
 - Otherwise, use name as written (see rules above)

Example Calendar Entry Format

- **Title:** XC Meet (Fiona)
- **Start:** 9/21/2025, 4:00 PM PST

- **End:** 9/21/2025, 6:00 PM PST
- **Location:** Memorial Park, Wilsonville, OR
- **Description:** Meet starts at 4:00 PM. Walkthrough at 3:00 PM.

Additional Notes

- ■ All locations are assumed to be **in Oregon**, specifically **near Portland** unless clearly stated otherwise.
- ■ Events are added to the **"Charlotte and Fiona"** calendar.
